Product Name :
Solar Position Tracking System

Product Code :
LBNY-0005-18400026

Description :

With the Solar Position Tracking System trainer, it is possible to monitor the most meaningful parameters of the sun tracker and to compare them with the expected optimal setting according to the actual sun position.

Features:

- Humidity sensor
- Compass sensor.
- Automatic or manual tracking.
- Protection against gust.
- Temperature sensor.

Technical Specification :

The trainer is composed of the following:

- A circuit breaker.
- A battery.
- A battery charge regulator, 12V, 30A.
- A supporting frame for the modules.
- A two axis solar tracking system, 2 x 20W, 12V, to allow the tracking of the sun light direction.
