Product Name:

Solar Photovoltaic Energy Installation Kit

Product Code: LBNY-0005-18400031

Description:

Training Objectives:

To calculate the inner resistance of the solar panels

To obtain a daily irradiation curve

To investigate how the solar irradiation influences the solar panel output voltage

To cover the solar panel with different materials

To use both solar power and energy stored in the battery to power the DC load

To test the complete system

To charge the battery using solar energy.

Technical Specification:

Two photovoltaic inclinable panels, 90W, 12V.

A frame for supporting the electrical components of the system: lamps, switches, protections, etc.

A supporting frame for the panel.

Two mains voltage lamps, dichroic 35W and LED 3W, with independent switches.

Two 12V lamps, dichroic 20 W and LED 3W, with independent switches.

Cables, connectors and accessories.

An electronic current regulation module, with LCD screen, output 12 V, 30 A.

An inverter, with output at mains voltage, 12 V, 30 A, 300 W.

A battery control switch, 0-600 V, 32A with battery, 100 Ah.
