Product Name :	**Product Code :**
CNC Machine Operator Program Based Interface	LBNY-0005-1920006

Description :

CNC Machine Operators require skills in operating a CNC machine but are not machinists. Many training programs for CNC Machine Operators use training really designed for machinists, which incorporates a lot of theory not relevant to the role of CNC Machine Operator. For example, a CNC Machine Operator needs to know how to run a CNC program not how to design one. Through industry task analysis as well as strong involvement with our development partner, a large global manufacturer, CNC Machine Operator Program brings a highly focused, streamlined set of skills to CNC Machine Operator training. NIMS provides national standards for metalworking. NIMS (National Institute for Metalworking Skills) endorses CNC Machine Operator Program -FANUC Based Interface exclusively as the recommended preparation method for the NIMS CNC Machine Operator Certification.

Features:
24 Self-paced Learning Units
132 Skills, 80+ Hours of Learning
Highly Interactive Exercises
Nationally Recognized Certification
Strong STEM Development
OTJ (On-The-Job Training) Guide
Instructor's Guide with Authentic Skill Assessments.

Technical Specification :

CNC Machine Operator Program Based Interface
