Product Name :
Solar Site Analysis

Product Code :
LBNY-0005-1930006

Description :

Solar Site Analysis course also covers array site evaluation and layout including methods used to perform a shading analysis, how to use a sun path calculator, and how to interpret a shading analysis. Solar Site Analysis provides detailed information on siting a solar array. Solar Site Analysis course covers site assessment and permitting describing the steps of a preliminary site assessment, the codes and jurisdiction authorities for solar energy system installation, and the permits and licenses required for solar energy system installation. It includes a Solar Site Analyzer, Student Learning Activity Module Set 1 Seat, a Teachers Assessment Guide, and Installation Guide. The course goes into component location on the site describing the guidelines for suitable locations of Electrical PV and Solar Thermal components.

Technical Specification :

Solar Site Analysis
