Product Name :Simple Harmonic Motion Kit

Product Code:I BNY-0005-19800010

Description:

The relationship between SHM and gravity is evaluated using the Katers pendulum, as well as understanding SHM in a mass springsystem. The Simple Harmonic Motion Experiments Kit enabless tudents to understand the effect of mass and length of pendulum on SHM and the period of oscillation.

Features:

Harmonic Motionincluding multiple practical experiments designed to further develop thestudents understanding in this field

Appliedstudent learning via Building and experimentation

Clear and concise pictorial assembly instructions enhance the learning experience

Multipleexperimental capabilities per self-contained kit

Supplied witha detailed instruction manual, covering the theory of Simple

Hands-onLearning

Tool-Less assembly.

Technical Specification:

Simple Harmonic Motion Kit

Laboratory Instrument India
