Product Name :
Runnable Auxiliary Power Unit Trainer

Product Code :
LBNY-0005-1990003

www.laboratoryinstrumentindia.com

Description :

The APU is mounted on a mobile stand with all relevant controls and accessories that facilitate the operation of the APU. This combination not only provides hands-on training, but also reinforces the knowledge gained in classroom lectures. The Runnable Auxiliary Power Trainer is a combination of an operational APU from a large airplane and computer based training (CBT).

Technical Specification :

Compressor: Two-stage Centrifugal Impellers
Combustion Chamber: Reverse Flow Can Type with Single Burner
Fuel System: Gear Pump with Centrifugal Governor, Acceleration and Temperature Controls
Lubrication System: Return Dry-Sump with engine driven Oil
Cooler and Blower
Power Output: 160 bhp
RPM: 40,800
Turbine: Radial Inflow Impeller
Starting: Electric Starter
Ignition: High Energy
Layout: Single spool with reduction gearbox, output speed 6,000 rpm.
