Product Name :
Auxiliary Power Trainer

Product Code :
LBNY-0005-19900013

Description :

The Auxiliary Power Trainer is a combination of a real APU from a large airplane and computer based training (CBT). The APU is mounted on a mobile stand that facilitates easy access to all parts for removal and assembly by the students. This combination not only provides hands-on training, but also reinforces the knowledge gained in classroom lectures.

Technical Specification :

Power Output: 160 bhp
RPM: 40,800
Compressor: Two-stage Centrifugal Impellers
Turbine: Radial Inflow Impeller
Starting: Electric Starter
Ignition: High Energy
Lubrication System: Return Dry-Sump with engine driven Oil Cooler and Blower
Combustion Chamber: Reverse Flow Can Type with Single Burner
Fuel System: Gear Pump with Centrifugal Governor, Acceleration and Temperature Controls
Layout: Single spool with reduction gearbox, output speed 6,000 rpm.
Weight: 91 kg.
