Product Name :
Aircraft Brake System Trainer

Product Code :
LBNY-0005-20000014

Description :

Aircraft Brake System Trainer is a training aid that displays two functional brakes representing multiple-disk brake and single disk brake. The trainer also demonstrates the functionality of parking brakes. The system is mounted on a display stand with caster wheels for easy mobility. The system includes Master Cylinder, Reservoir, Parking Brake Valve, and a Selector Valve which allows the selection of any of the two brakes for operation by the Brake Pedal. The students can be taught how to bleed the brakes. Also, the instructor can explain the procedures for the maintenance of brake system.

Features:

- Ergonomic design
- Hydraulic Reservoir
- Parking Brake Valve
- Master Cylinder
- A complete and functional single-disk brake system.
- A complete and functional multiple-disk brake system
- Selector Valve to choose one of the two brakes for operation / demonstration
- Dimensions: 32 Wide x 19 Deep x 48 High.

Technical Specification :

Aircraft Brake System Trainer
