Product Name :
Aircraft ADF System Trainer

Product Code :
LBNY-0005-20100011

Description :

Aircraft quality electrical shielded wiring, cables, connectors, and harness assemblies and easily removable AD Fantenna with coaxial cable connections. All interconnections are of aircraft quality electrical shielded wiring, cables, connectors, and harnesses. Aircraft Automatic Direction Finder Equipment Trainer is designed to provide hands-on training on a real and operational equipment approved for aircraft installation. Using Avionics Instructors can effectively teach students on installing, removing, and testing an ADF unit. Students also develop proper understanding and learn how to trouble shoot the ADF equipment. The equipment is mounted on a mobile workstation containing air craft ADF unit, ADF indicator, and ADF loop and sense antenna assembly package. The work station includes a test panel console for bench testing of ADF equipment.

Features:

- Durable, steel frame, Vertical standing panel with sturdy casters
- Adjustable height test panel
- ADF Indicator
- Wood shelf
- Accessories storage case
- Adjustable height equipment panels
- Avionics panel, complete with Allied Signal KX 155 with Indicator
- Aircraft Antenna mounted on rotating machanis
- Power Supply with voltage and current meters, power cord
- Installation and mounting kit.

Technical Specification :
