**Description :**

The Kit uses the arts, innovation and adolescent-led projects as methods to achieve those outcomes. Flexible and adaptable, the Kit can be used in a range of programming contexts, including recent-onset emergencies and protracted crises, as well as other low resource environments. The purpose of the Kit is to promote positive outcomes for adolescents' psychosocial wellbeing, life skills and active engagement in their communities. The Adolescent Kit for Expression and Innovation is a package of guidance, tools and supplies to support country programmes to reach and engage adolescents ages 10-17 affected by conflict and other crises. It is also designed to be adapted to the developmental capacities, interests and priorities of the adolescents with whom it is used. The Kit can be used to support new programmes or introduced into ongoing initiatives.
