Product Name :
Cervical dilatation model

Product Code :
LBNY-0015-220011

Description :

Lifelike, three-dimensional model used for training cervical dilatation observation for childbirth management; allows inspection with speculum.
To be used as a table top, as well as wall mountable.
Realistic models represent changes in dilation up to 10 cm.

Technical Specification :

A set of 6 models simulating uterine cervix in 6 different stages of dilatation during childbirth.
