**Product Name :**  
Simulator, premature infant care, dark

**Product Code :**  
LBNY-0015-220019

#### **Description :**

Simulator is used to facilitate learning preterm infant care, including thermal care and feeding support such as exclusive breastfeeding, alternative oral feeding and enteral feeding with nasogastric tube. Simulator, premature infant care, dark complexion.

Simulator consists of a dark skin manikin, that has an appearance and size of approximately 32 weeks old premature infant, together with Breastfeeding Simulator and Preterm Wrap.

Can be used to practice:

Breastfeeding - proper positioning and attachment.

Intragastric tube placement

Skin-to-skin care

Cup feeding

Material of the simulator: Vinyl, Silicone, Polyoxymethylene - POM, Poly vinyl chloride - PVC, Polypropylene - PP, Thermoplastic polyurethane - TPU

Texture of the simulator: Soft and smooth, friction free to demonstrate the desired procedures. Realistically sculpted to resemble and simulate a premature infant, feeling smooth / resilient / bony as relevant and suitable for simulation.

#### **Technical Specification :**

Environmental conditions:

Storage conditions:

Temperature (unfilled) -10 °C to 50 °C (14 °F to 122 °F)

Operating conditions:

Temperature 15 °C to 40 °C (59 °F to 104 °F)

---

Relative Humidity 5-100% RH

Supplied with:

Intragastric tube

Training stethoscope

Head cap

Breastfeeding Simulator

Preterm Wrap

Tape to attach intragastric tube

20 ml. syringe

Diaper

Shoulder bag for transport/storage.

Weight and volume:

Volume per unit: 0.022 cbm

Gross weight per unit: 2 kg.
