Product Name :

Bulb, suction, neonatal, reusable

Product Code :

LBNY-0017-2200036

www.laboratoryinstrumentindia.com

Description :

A reusable, hand-held, manual suction device designed to suck gently and clear excessive mucus from the airway of a newborn to facilitate easier breathing.

Reusable

Material: silicone

Can be autoclaved at 136°C and withstand other means of High Level Disinfection

Fully made from transparent or translucent material

No use of natural rubber latex

Fluid capacity: 75 ml

Can be disassembled (opened up) for proper cleaning. After opening up it should be easy to access the internals of the bulb allowing for thorough cleaning.

Nozzle dimensions at tip: Inner diameter (ID) 3.0mm \pm 5%

Nozzle dimensions at tip: Outer diameter (OD) 4.5mm \pm 5%

Suction strength should reach: 100mmHg (136cm H₂O).

Technical Specification :

ENVIRONMENTAL CONDITIONS

Storage conditions: -20°C - 60°C / 90% RH

Operating conditions: 5°C - 20°C / 90% RH

WEIGHT AND VOLUME

Volume: 0.55 dm³

Weight: 0.11 kg.
