Product Name :
Solar Tracking Control Trainer

Product Code :
LBNY-0002-620003

Description :

Solar Tracking Control Trainer

Technical Specification :

This trainer is designed to study solar tracking control and PWM charge control
This set up helps to understand PWM charge controller depending on
Time taken by battery to get fully charged
To measure input power and output power to get efficiency of PWM charge controller
Series and parallel combination of Solar Panels
Effect of sun tracking at different angle of inclination
Performance analysis by comparing the output of the PV module with PWM controller.
Display units for Voltage and current measurement.
System integrated with PWM charge controller along with the batteries.
Simple variable load demonstration by varying the rheostat.
Including with Laptop Computer
PWM charger

Solar Tracking Control Trainer, Solar Tracking Control Trainer Equipments, Solar Tracking Control Trainer Tools, Solar Tracking Control Trainer Tool Kits, Solar Tracking Control Trainer Manufacturers, Solar Tracking Control Trainer Suppliers from India, China, Kenya
