**Product Name :**

AWD, Periphery kit, Equipment

**Product Code :**

LBNY-0020-220001

[www.laboratoryinstrumentindia.com](http://www.laboratoryinstrumentindia.com)

**Description :**

The Periphery Kits are designed for initial response at periphery level within an existing health structure with in-patients faculty such as Cholera Treatment Unit (CTU) or a Health Center (HC).

**Technical Specification :**

Target Population and period of use:

The kits are designed to help prepare for a potential cholera and acute watery diarrhoea outbreak and to support the first month of the initial response to an outbreak.

Designed for the treatment of 100 patients: 40 severe and 60 mild or moderate cases. Composed of modules for drugs, renewable supplies, equipment and logistics.
