Product Name :

AWD, Periphery kit, Renewable

Product Code :

LBNY-0020-220002

www.laboratoryinstrumentindia.com

Description :

The Periphery Kits are designed for initial response at periphery level within an existing health structure with in-patients faculty such as Cholera Treatment Unit (CTU) or a Health Center (HC).

Technical Specification :

The AWD kits are designed to help prepare for a potential cholera and acute watery diarrhoea outbreak and to support the first month of the initial response to an outbreak. After this period supplies should be ordered based on needs.

Designed for the treatment of 100 patients: 40 severe and 60 mild or moderate cases. Composed of modules for drugs, renewable supplies, equipment and logistics.
