Product Name :
Reagents Vit A/Oil

Product Code :
LBNY-0022-2200010

www.laboratoryinstrumentindia.com

Description :

Each reaction vial contains 2 ml of reagents, developed to determine quantity of vitamin A in sample.

Composition of reagent:

Antimontrichlorid

Trichloromethan

Technical Specification :

Supplied as set containing:

100 x Reagent vial

Number of measurements: 100

100 x Single use syringe, 1ml

100 x Hypodermic needle, 21G
