Product Name :

Cushion,wheelchair,pressure,mod no layer

Product Code :

LBNY-0024-2200016

www.laboratoryinstrumentindia.com

Description :

For CHILD or ADULT wheelchair users who are at risk of pressure injuries and who need good support to maintain stability and an aligned posture. Cushion and cover function to reduce heat and moisture generated when the user is sitting on the cushion.

Pressure-redistribution cushion with moderate/partial offloading or immersion/envelopment features: Contoured cushion without top layer.

Technical Specification :

Characteristics:

Depending on model selected: Thigh area: sloping down OR level

Depending on model selected: Thigh area: integrated inside thigh support OR inside- and outside thigh support

Depending on model selected: Firm, non-deforming, pre-contoured base, with pre-shaped seat bone well area

OR firm base with deforming properties in the seat bone well area so that the well area appears flat. Variations in foam support create a functional well area with moderate or partial offloading or immersion.
