Product Name :

Cushion,wheelchair,pressure,deep,section

Product Code :

LBNY-0024-2200017

www.laboratoryinstrumentindia.com

Description :

Wheelchair seat cushion: Pressure-redistribution cushion with deep/full offloading or immersion/envelopment features: Cushion with multiple sections without dedicated structural base.

INTENDED USE

For CHILD or ADULT wheelchair users who are at risk of, or have existing or previous pressure injuries, and who need good support to maintain stability and an aligned posture. Cushion and cover function to reduce heat and moisture generated when the user is sitting on the cushion.

Pressure-redistribution cushion with deep/full offloading or immersion/envelopment features: Cushion with multiple sections without dedicated structural base.

Technical Specification :

Characteristics:

Cushion consists of multiple sections with sealed air-filled cells

No dedicated structural base

Volume can be manipulated in different sections to accommodate minor fixed pelvis and hip postural deviations
Placement of sections and manipulation of volume by removing/adding cells create pelvis well area for offloading and full or deep immersion and envelopment

Thigh area: level.
