Product Name :
Electrical Drive Trainer

Product Code :
LBNY-0002-620007

Description :

Electrical Drive Trainer

Technical Specification :

The training system is an important part of the mechatronics training systems in vocational education. It is mainly used in colleges and universities, higher vocational colleges, undergraduate colleges. It has rich potential resources and a wide range of promotion.

This system can carry out corresponding practical technical training for majors such as mechanical, mold, mechatronics and electrical integration, electrical automation etc.

At the same time it takes the training for fitters of other majors into account.
