**Product Name :**  
Lens and its application experimental device

**Product Code :**  
LBNY-0004-10100041

**Description :**

The product is composed of three base, two biconvex lens, one biconcave lens, three supporting rod, white screen, ground glass, frosted glass screen in, light source, and so on.

**Technical Specification :**

Base material for engineering plastics, bottom diameter:80mm, height:35mm; Lens diameter 40mm, substrate using optical glass production, One of the biconvex focal length is  $100 \pm 3$ mm, another is  $50 \pm 3$ mm, the biconcave lens focal length is  $-75 \pm 5$ mm, The operating voltage of the light source is DC 1.5 ~ 3V.
