Product Name :
Electromagnetic Oscillation Demonstration

Product Code :
LBNY-0004-10100042

Description :

Can demonstrate damped oscillation and amplitude oscillation phenomenon, the inductance with second gear, capacitance also with second gear to get four different frequencies of oscillation amplitude, oscillation damping, needle visible pendulum supported more than 4 times, panel size is not less than 450mm * 320mm.

Technical Specification :

Electromagnetic Oscillation Demonstration

Laboratory Instrument India
