Product Name :
Technical Documentation and Software

Product Code :
LBNY-0002-830021

Description :

Technical Documentation and Software

Technical Specification :

Technical Documentation and Software

Datalogger User Manual

Datalogger Technical Manual

Software for Datalogger Configuration and Technical Manual

Manual of Telemetry Units and Configuration Software

Sensor's Calibration Certificate

Electrical Connections & Diagrams (datalogger, electronic sensors, telemetry units, power supply, electrical protection)

Ideal applications include eddy covariance, wind profiling, HVAC, weather stations, vehicle testing, air quality, process control, mesonet systems, agriculture, soil moisture, time-domain reflectometry, water quality. Integrated keyboard and display screen let you program, manually initiate data transfers, and view data, all on site.

Includes a current excitation channel allowing direct connection of PRTs or other sensors that use a current excitation

Gas Discharge Tube (GDT) protected inputs

Compatible with channel expansion peripherals allowing you to expand your system

Battery-backed clock that ensures accurate time is maintained while data logger is disconnected from battery power.
