Product Name :
Experiment Box for Student in Electricity

Product Code :
LBNY-0004-101000131

Description :

It is used in student experiments: composing series circuit and parallel circuit, measuring current with ampere meter, measuring voltage with voltmeter, changing current density with slide rheostat, measuring power of bulb, studying electromagnet and installing DC motor model.

Technical Specification :

Inner packs dimension (L*W*H CM): 38.3*7.2*26.5
