

Email : sales@laboratoryinstrumentindia.com

Product Name :
High Temperature Diffusion Cloud Chamber

Product Code :
LBNY-0004-101000176

Description :

It can continuously and steadily observe paths characteristics of high speed electrically charged particles for long-term without dry ice agent and dynamic operation. It is used to observe basic particle track in physics teaching of lecturing nuclear structure, it is necessary demonstration instrument for secondary school and can be used for students' grouping experiment in colleges and universities.

Technical Specification :

High Temperature Diffusion Cloud Chamber

Laboratory Instrument India
