

Email : sales@laboratoryinstrumentindia.com

Product Name :
Small Motor Experiment Apparatus

Product Code :
LBNY-0004-101000187

Description :

It is used to understand indirect relation between verified armature turning and current direction, and direction of magnetic field line, and used to master principle of rotation of motor working. It is used for student to familiar with main structure of motor, and it can run on AC or DC.

Technical Specification :

Small Motor Experiment Apparatus

Laboratory Instrument India
