Product Name :
Flat Mirror Imaging Experimental Apparatus

Product Code :
LBNY-0004-101000188

Description :

It consists of plane mirror, plane mirror stands, triangular rule, plastic candle. The object and image flips left to right, but are the same size. The image of object affected in plane mirror is virtual image. It is used to prove that the line between plane mirror and image, and the line between object and image are normal to mirror surface, and are equal to distance of mirror surface.

Technical Specification :

Flat Mirror Imaging Experimental Apparatus

Laboratory Instrument India
