Product Name :
Detachable Transformer

Product Code :
LBNY-0004-101000195

Description :

The transformer core, primary & secondary coil of instrument can be disassembled and recombined. The instrument consists of transformer U-shaped core, primary coil, secondary coil and transformer assembly-disassembly solid support. It is a demonstration experimental instrument used in middle school physics electromagnetic and electronic chapter teaching.

Technical Specification :

Detachable Transformer
