Product Name :
Cohesion Demonstrator

Product Code :
LBNY-0004-101000207

Description :

It consists of two hollow leaded cylinder, scraper, and squeezing board controller. It is a demonstration instrument used to demonstrate attraction of solid molecular in middle school and secondary vocational school physics teaching, as well as it is used in students' experiment and extracurricular experiment of school technology group.

Technical Specification :

Cohesion Demonstrator
