Product Name :
Torricellian Experiment Demonstrator

Product Code :
LBNY-0004-101000325

Description :

It consists of Pascal scale, glass tube, long pointer, glass bush, support plate, short pointer, cistern and base. It is used to demonstrate experiments on atmospheric pressure in middle school physics teaching, to demonstrate the existing of atmospheric pressure and to measure the intensity of pressure.

Technical Specification :

Torricellian Experiment Demonstrator
