

Email : sales@laboratoryinstrumentindia.com

Product Name :
Students Line Experimental Board in High School

Product Code :
LBNY-0004-101000376

Description :

It is used to do experiments: use of oscilloscope, determination of metal electrical resistivity, refitting ammeter into voltmeter, determination of electromotive force of battery and internal resistance of the battery, observing AC rectification and filtered waveform, installing simple radio and measurement of capacitance using capacitor discharge.

Technical Specification :

Students Line Experimental Board in High School
