**Product Name :**  
Photoelectric Effect Demonstrator

**Product Code :**  
LBNY-0004-101000384

**Description :**

It is used to demonstrate instantaneity of photocurrent and saturation value of photocurrent, and that the strength of photocurrent is proportional to the intensity of incident light in unit time in secondary schools, colleges and middle school physics.

**Technical Specification :**

Photoelectric Effect Demonstrator

**Laboratory Instrument India**
