Product Name :
Electromagnetic Devices Study Module

Product Code :
LBNY-0002-620012

Description :

Electromagnetic Devices Study Module

Technical Specification :

Assess the properties of magnetic core materials and the field strength around a magnet
Use the Hall probe to determine the behavior of an electromagnet with different core materials and their relative permeability
Determine the effect of core materials on coil inductance
Investigate pull-in voltage for a solenoid
Determine pull-in and drop-out voltage and current for a relay
Diagnose faults in relay circuits
Investigate the operation of a simple DC motor

Electromagnetic Devices Study Module, Electromagnetic Devices Study Module Equipments, Electromagnetic Devices Study Module Tools, Electromagnetic Devices Study Module Tool Kits, Electromagnetic Devices Study Module Manufacturers, Electromagnetic Devices Study Module Suppliers from India, China, Kenya
