Product Name :
Plant

Product Code :
LBNY-0006-1010004

Description :

It's equipped with a number of tools to facilitate students to observe their own collection of plants. The instrument is mainly used for scientific inquiry experiments, so that students understand the difference between different plants. At the same time, pictures and specimens are also used to make students collect objects in natural life so as to explore specimens of plant structure in nature.
