Product Name :
Water Properties

Product Code :
LBNY-0006-1010009

Description :

The instrument is equipped with a PH test paper to test the pH of the water. The submarine model is used to test the ups and downs of the object, assemble the kinetic energy of the water wheel, and the boiling point of the liquid to simulate the boiling of the water. The product mainly explores the nature of water and some of the buoyancy associated with water, the boiling experiments of water power and simulated water.

Technical Specification :
