Product Name :
Insect Breeding and Life Cycle

Product Code :
LBNY-0006-10100014

Description :

This instrument is mainly used for scientific experiments to collect small insects and different animal embedding specimens. The suit is made of safe, non-toxic and highly transparent organic macromolecule resin material by embedding the animal specimen in the form. It mainly consists of two parts: transparent macromolecule resin material and specially treated specimen. Students can directly observe the life history to understand the different animal by direct observation or magnification.

Technical Specification :

Insect Breeding and Life Cycle
