

Email : sales@laboratoryinstrumentindia.com

Product Name :
Primary Optical Experiment Box

Product Code :
LBNY-0006-10100052

Description :

It is used in optical grouping experiment: production and change of shadow, rectilinear propagation of light, pinhole imaging, reflection and refraction of light, optical dispersion, image for plane mirror, simple periscope making, convex lens amplification, focusing and images, camera simulated experiment and formation of myopia simulated experiment.

Technical Specification :

Primary Optical Experiment Box

Laboratory Instrument India
