Product Name :
Electrodialysis Experiment Device

Product Code :
LBNY-0007-10100035

Description :

It can be used not only in the classroom demonstration of teachers, but also in the hands-on operation of students. The operation is simple, the effect is obvious, the durability is good, and the utility model has good practicability. The dialysis experiment apparatus is used in the experiment of colloid dialysis in high school chemistry.

Technical Specification :

Electrodialysis Experiment Device
