Product Name :
Microscale Chemical Experiment Box in Middle

Product Code :
LBNY-0007-10100080

Description :

It is used to do chemistry grouping experiments in middle school, such as: pump and property of oxygen, estimation of size of permanganate ion, preparation of percentage concentration solution, purification of crude salt, preparation and property of carbon dioxide, property of acid, property of alkali and salt, identification of substances and measure of acid-base property of soil, water quality and beverage.

Technical Specification :

Microscale Chemical Experiment Box in Middle
