Product Name :
Turbidimeter Kit

Product Code :
LBNY-00016-110007

Description :

The of turbidimeters offers simplistic operation combined with intelligent instrument engineering to provide an unparalleled level of accuracy in turbidity measurement. Featuring the patent-pending sensor technology, the optical system is engineered with dual detectors to deliver a ratio reading which mitigates common measurement stability issues. Reads up to 4000 NTU without the need for dilutions
Touchscreen interface for ease of operation
Supplied with AA
Superior data management - easily save and recall measurement data sets
Rechargeable battery pack accessory available
This user interface helps eliminates common frustrations and prevents errors. The data logging capabilities allow you to record the testing location, operator's identification, time and date along with the measurement. The intuitive, touchscreen interface makes it easy to perform procedures and interpret results. With function applications, you can navigate between settings and performing that function efficiently. Stored data can be transferred to a computer via USB.

Technical Specification :

Turbidimeter Kit
