Product Name :
GFS Chemicals Individual Primary Turbidity Standards

Product Code :
LBNY-00016-1100019

Description :

Consist of polymer microspheres suspended in a pure, aqueous medium
Uniform in particle size distribution to ensure consistent light scattering and precise enough to permit calibration down to and including 0 NTU
Primary turbidity standards for use in 90° nephelometers such as the 2100A, On-line instruments.
Ready to use — no mixing or dilution required
Nontoxic and won't settle out of suspension
Designed for 90° white light turbidimeters (EPA 180.1 design).
Guaranteed accuracy within 1%.

Technical Specification :

GFS Chemicals Individual Primary Turbidity Standards
