Product Code :

Product Name : GFS Chemicals Individual P

GFS Chemicals Individual Primary Turbidity Standards

Description :

Consist of polymer microspheres suspended in a pure, aqueous medium

Uniform in particle size distribution to ensure consistent light scattering and precise enough to permit calibration down to and including 0 NTU

Primary turbidity standards for use in 90° nephelometers such as the 2100A, On-line instruments.

Ready to use - no mixing or dilution required

Nontoxic and won't settle out of suspension

Designed for 90° white light turbidimeters (EPA 180.1 design).

Guaranteed accuracy within 1%.

Technical Specification :

GFS Chemicals Individual Primary Turbidity Standards
