Product Name :
Densitometer

Product Code :
LBNY-00016-1100051

Description :

Densitometer is a compact device that can be used to measure turbidity (in the range of 0.5 to 4.0 McFarland units) of cell suspensions in a variety of life science applications.

This is ideal for determining concentration of cells for fermentation process, detecting the susceptibility of micro-organisms to antibiotics, identifying micro-organisms with various test systems, and measuring optical density at fixed wavelength.

This product features a measurement time of 1 second, a precision of 3%, and small footprint and low-profile design.

Technical Specification :

Densitometer
