Product Name :
Flame-Retardant Coveralls

Product Code :
LBNY-00017-11000472

Description :

Coveralls are antistatic and breathable and can be worn over primary thermal protective garments as a first line of defense for wearer and thermal garments underneath.
Disposable protection against nuisance contamination by solids and nontoxic liquids. Front zipper and collar with serged seams for added protection.
No elastic. Set sleeve for greater arm movement. Light blue.
Provide enhanced protection from moisture, sparks, and flames for applications in steel mills, coal mines, refineries, laboratories, and by utilities workers.
Made of nonwoven fabric wood-pulp/polyester blend treated to provide fire retardant and liquid repellancy.
