Product Name :
Microporous Coveralls with Attached Hood and Boot

Product Code :
LBNY-00017-11000849

Description :

Microporous Coveralls with Attached Hood and Boot deliver protection and comfort through a strong and durable fabric in a suit designed for worker comfort.

An attached hood and boots provide full-body protection from head to toe.

This coverall offers base-level protection against light liquid splashes and nonhazardous particulates providing the optimal balance of comfort, durability, and protection.

These Microporous Coveralls are as comfortable as they are safe. State-of-the-art lamination technology allows for maximum breathability.

A soft non-woven fabric combined with a microporous film allows moisture vapor to escape, so you stay cool even in hot or damp environments.

Elastic back stretches with user for more comfort and better tear resistance

Elastic wrists offer a snug fit and help keep dust and other contaminants out

Environmentally friendly - can be recycled after use.

An attached hood and boots provide more complete body protection

Roomy, seamless shoulder area resists tears and provides more protection in key exposure areas

A wider, gusseted crotch gives the wearer more room to move in all directions without ripping fabric.

Technical Specification :

Microporous Coveralls with Attached Hood and Boot
