Product Name :
Chem Splash 1 Chemical Splash Coveralls with Taped
Seams, Hood and Boot

Product Code :
LBNY-00017-11000959

Description :

These durable and disposable coveralls with elastic wrist, ankle, and back protect against chemical splashes and toxic particles.
A high-contrast red stripe lets you quickly distinguish this taped-seam garment from coveralls made with serged seams
For added comfort, seamless shoulders help prevent tears and allow you to move more freely as you work
With an attached hood and boots, you're protected from head to toe
Taped seams offer added protection over serged seam coveralls
A wider, gusseted crotch gives the wearer more room to move in all directions without ripping fabric
Proprietary, hybrid membrane fabric offers a high moisture vapor transfer rate (MVTR), so you stay cool as you put in a hard day's work
A storm flap over the zipper with pressure-sensitive tape helps prevent hazardous liquids from seeping through exposed zipper seams
Possible applications include manufacturing, emergency response, environmental cleanup, and more.
Elastic back stretches with the wearer for more comfort and better tear resistance
Elastic wrists and ankles offer a secure fit to keep sleeves and pant legs in place to prevent skin exposure.
