Product Name :
Basic Communication System

Product Code :
LBNY-0005-1130001

Description :

Analog Communication System is equipped with power supply and signal unit. Students only have to adopt the oscilloscope to complete various. System modularity maximizes flexibility and variety for experimentation, and allows possibility for expansion and customization. The trainer includes the basic modules with experimental circuits. It offers the beginner complete courses of basic analog and digital communication.

Technical Specification :

Basic Communication System
