**Product Name :**  
Hydraulic Training System

**Product Code :**  
LBNY-0005-1150002

**Description :**

The trainer can be upgraded to high-level automation engineer with the help of the trainer system. The Hydraulic Training System is launched to offer enriched education from basic oil pressure components, advanced oil-pressure loop design to PLC - based electrical control system.

**Features:**

Trainees learn PLC programming, including architecture, instructions and ladder diagram.  
Trainees get familiar with the principles and applications of various oil pressure components.  
Trainees learn oil-pressure loop design.

**Technical Specification :**

Hydraulic Training System

**Laboratory Instrument India**
