**Product Name :**Hydraulic Training System

Product Code:

## **Description:**

The trainer can be upgraded to high-level automation engineer with the help of the trainer system. The Hydraulic Training System is launched to offer enriched education from basic oil pressure components, advanced oil-pressure loop design to PLC - based electrical control system.

## Features:

Trainees learn PLC programming, including architecture, instructions and ladder diagram. Trainees get familiar with the principles and applications of various oil pressure components. Trainees learn oil-pressure loop design.

## **Technical Specification:**

Hydraulic Training System

**Laboratory Instrument India**
