Product Name :
Digital Force Display

Product Code :
LBNY-0005-1390001

Description :

The display measures up to four forces from sensors on many of the experiments in the Structures range. A four-way selector switch selects the displayed force. The Digital Force Display fixes to a Structures Test Frame. This keeps the experiments tidy and saves space around the work area. Includes an output to the Automatic Data Acquisition Unit. When used with the, the Digital Force Display outputs all four force signals at the same time to the Structures Software. The display automatically adjusts its range to the force.

Technical Specification :

Display: Liquid crystal

Ranges:

0.0 to 20.0 N

0 to 500 N

Nett dimensions and weight: 150 x 140 x 80 mm, 1 kg

Packed dimensions and weight: 0.016 m³, 2 kg.
